Lance, this is the latest version of the draft response to the concerned citizen at Wilcox that wrote to President Obama.

If I have to go there and meet with him, as suggested by my managers, this trigger that we may need a new fact sheet for the public, and maybe a meeting if ODEQ request one. It has been over a year since the last fact sheet or meeting. (There is a lot of press and TV interest in this site.)

It could be a short fact sheet. There isn't much to say at this moment. We may cover the summer fencing, signage, closing of the well by Removal, and the December surface soil sampling for lead at a property of concern by Removal.

But we will need some text to include where we are in the Enforcement Remedial process. Can you put something together on what can we say?

Maybe something in terms of special notice letters were sent in summer to potential responsible parties to invite them to enter into negotiations to carry out a remedial investigation. Since no positive responses were received, the enforcement process continues to go forward by collecting more detailed evidence of past practices and operations ????????

Need help from you and Lydia in how much we can say, so that the public could understand we are actively working on this project.

Cc: Bill – Community Involvement Coordinator. Bill there is a call Monday at 2:00 with ODEQ. (Mark, Bart, Amy Brittain, ODEQ)

This is the latest version of the response. I am thinking we can talk with ODEQ during Monday call, send the letter, and plan to travel and meet with him and Todd when convenient to Mr. Lane.

Will need the final report of his property soil sampling to share with him, and since all 2" surface soil levels are below screening levels, no further immediate action for now until it gets into the Remedial process.

John, what you think now?

Mark took a cut to making some changes, and left more open any future action, rather than saying no immediate action at this time.

There is a call on Monday at 2:00 PM with A Brittain of ODEQ and Removal.

level of lead on property

I took a shot to making a draft of a possible response, based in another site that they wrote to Obama and got the control. Take a look to the attached draft.

And I see results, one sample with high numbers. We can further talk tomorrow.

Bart,

Attached sample results and map. I'll be in the office tomorrow and can discuss with you then. If there's any other info you need from me in the meantime please let me know.

Also got word from Todd Downham late last week that Mr. Lane and his family may be living elsewhere. Not sure if it's a permanent or temporary.

Can you send me and Mark Hayes (Removal) the *(file: AX-15-000-4260-WH Lane - High level of lead on property.pdf)*

So that we could work out a response.

Thanks

Good Morning, I am not certain if John sent you any updates on this, so I am sending one. If this is redundant, then please ignore.

We had a meeting with the team, and the decision is that a letter will be sent to the control requester. You and Mark have been assigned as the leads. The idea is to send a letter describing how ODEQ and EPA have been on site, that EPA was on site sampling when the request was sent, that EPA has the data and is including for his review, etc. There was also talk about coordinating with the local health department for some lead education and perhaps a meeting.

Katrina,

Please work with Bart and Removal to pull together a response to this control. It is the Wilcox site.
